

DENTIST

ORTHODONTIST

- Bachelor's degree + dental school to earn a doctorate

- Bachelor's degree + dental school degree + 2-3 years of orthodontic training

- Generalist in dental and oral health

- Specialist who diagnoses, prevents, and treats teeth and jaw irregularities

- Diagnoses and treats diseases affecting teeth and gums

- Specializes in aligning teeth and jaws

- Treats a broad range of dental issues

- Specialist in straightening teeth with braces and aligners

Collaboration between dentists and orthodontists leads to optimal dental esthetics and oral health.

Many general dentists choose orthodontists to treat their own children for braces, highlighting the value of specialized orthodontic care.
